

VILLAGE OF ONEKAMA

“On Beautiful Portage Lake”

Project Site One

Farr Center
5283 Main Street
Onekama, MI

Building has approximately 222 linear feet of 5” aluminum guttering and 72 linear feet of 6” aluminum downspout removal and replacement, 138 square feet of vinyl siding and 24 linear feet of vinyl outside corner post removal and replacement, 806 square feet of brick to be cleaned, prepared, and painted, and 260 feet of 6” metal fascia to be replaced.

The project will also remove and replace three doors and eighteen windows including but not limited to wrapping wooden windows with metal trim plus any necessary preparation work and painting. The project consists of removing all of the existing damaged siding and underlayment and disposing of the materials in a proper landfill.

Project Site Two

Park Bathhouse
4775 Main Street
Onekama, MI

Building has approximately 145 square feet of damaged vinyl siding. The project consists of removing all of the existing damaged siding and underlayment and disposing of the materials in a proper landfill, providing the proper replacement siding, proper air / moisture barrier material and approximately 24 feet of 6” fascia metal.

The contractor is responsible for the condition of the work sites and shall control and clean up all trash and debris during the project. The sites will be clean when all work is complete. Trash generated during the project is the responsibility of the contractor.

No electricity, natural gas, water, sewer, or trash service is available at the work site.
